

# Learning Live 2022 Presentations

30th November to 1st December

## **Synthetic Turf Solutions**

Haaye de Jong - Southwest Greens  
Construction

### **Learning Outcomes**

Learn about the differences between synthetic turf solutions today versus 20 years ago, plus the place and role of synthetic turf solutions in the different spots on a golf course (academy, short game, indoor, driving range).

### **Brief / Outline of the projects in these case studies**

Target green projects on 4 courses (Stoneham, San Roque, Fox Hills, Bally Bunion).

### **What challenges did you face during this project?**

To make the industry and course owners understand the different product levels of the synthetic systems in combination with classic golf course construction and the budget that comes with each solution.

# Learning Live 2022 Presentations

30th November to 1st December

## **What innovations did you employ in this project?**

Classic golf course range design with integrated high end synthetic turf leads to accepted beauty and creates a range that can be used by juniors/members as a short course when the club wishes.

## **What Went Well or What Went Wrong? Or ... Would you do anything differently?**

When the end result is achieved the people involved see the added value story. The challenge is to get the added value story across before the project so there is little "gap" between expectation and execution.
