

Learning Live 2022 Presentations

30th November to 1st December

Hydroponic Turf

Kneale Diamond - Capillary Bunkers

Learning Outcomes

They will learn all about the new options available through Hydroponic turf and how it will help reduce water usage and help provide an insight into new ways to grow grass

Brief / Outline of the projects in these case studies

The history and challenges found at Angfarjeparken in Helsingborg

What challenges did you face during this project?

The biggest challenge was trying to convince the city that this was the future of Turfgrass and then having contractors install something for the first time always creates its own challenges

What innovations did you employ in this project?

The first true Hydroponic Turf arena in some harsh growing conditions with everyday challenges

What Went Well or What Went Wrong?

The performance has been exceptional and very well received and has probably surpassed what most people expected
